**FOR IMMEDIATE RELEASE**

**Rocky Mountain Vein Clinic Announces Grand Opening of Bozeman Clinic**

**Billings, Montana Nov. 1, 2013** – Rocky Mountain Vein Clinic is pleased to announce the grand opening of a new clinic in Bozeman, Montana on November 1<sup>st</sup>, 2013. Located at 822 Stoneridge Drive, Suite 2, the Bozeman Clinic will be the third RMVC clinic in the region, with additional facilities in Billings, and Cody, Wyoming. “We continue to experience overwhelming patient demand,” said Dr. Bo Johnson, M.D., Medical Director and founder of RMVC, “The Bozeman clinic will allow us to provide the latest in vein care treatment to patients throughout Western and SW Montana.

The only comprehensive, dedicated vein care clinic in the region, Dr. Johnson and the RMVC staff have performed over six thousand vein procedures – a claim no other facility in the region can make. While other clinics may offer vein treatments in addition to their primary specialty, RMVC has distinguished itself by focusing solely on the treatment of venous disease. Renowned for its comprehensive and educational website, [www.rockymountainveinclinic.com](http://www.rockymountainveinclinic.com), patients have access to their own medical records, information on vein disease and treatments, as well as the ability to watch actual treatment videos.

Founded on the principles of superior cutting edge care delivered in a warm, friendly and caring environment, RMVC has not only faced overwhelming patient demand, causing it to double its treatment facilities in Billings, it has also resulted in the ability to attract top-notch physicians like Dr. Philip Seu, who will be the Bozeman Clinic Director. “Dr. Seu has been critical in us achieving our goal of being the best vein care facility in the region and expanding our services to the Western Montana region,” remarked Dr. Johnson.

A Board Certified General and Transplant Surgeon, Dr. Philip Seu joined RMVC in 2011, when he moved to Montana from Palo Alto, CA. He received his undergraduate degree in Biology from Baylor University and graduated from the University of Texas Medical Branch. Dr. Seu then trained at UCLA in general and transplant surgery. In addition to performing liver transplants, Dr. Seu held faculty positions at the UCLA School of Medicine and Baylor College of Medicine, where he taught medical students and trained residents and other surgeons. “When I was researching vein centers,” said Dr. Seu, “I knew that I wanted to work with someone who understood the dynamic nature of the medical field and embraced that change in order to produce

positive patient outcomes. When I came across Dr. Johnson, and RMVC, I knew I'd found exactly that."

Patients interested in learning more about RMVC, or scheduling an appointment, should visit [www.rockymountainveinclinic.com](http://www.rockymountainveinclinic.com) or call (406) 922-8346.
